Notes:

"Type" is based on custom filters of the Make/Model section of the FAA Registry. These filters allow combining of different designations of given types, e.g., "RV-3", "RV3" and "RV 3" will all be designated "RV-3"

There are thousands of homebuilt types of which few examples exist, or have names which are not variation of common homebuilt names. These are not included in the list above.

If "Type" includes the suffix "EX-AB", ONLY those aircraft whose registry entry lists them as Experimental Amateur-Built are counted. This leaves off any Experimental LSAs or Experimental aircraft outside of EX-AB. If "Type" does not include "EX-AB, then any oddies in certification (such as listing a classic homebuilt as normal category) are ignored.
